

Why I Won't Ride a Bike

My feet can't reach.
The horn won't squeech.
And I might hit a bump
Or run over a stump!
The seat's real wiggly
Plus bouncy and jiggly.

And Look!

The front wheel's loose
And the handlebars feel
Like the horns on a moose.
All right. What's the use?
I can't tell a lie.
The real reason why
Is I'm too scared to try!
Do you think if I practice
I'll get better at this?
